

ChemFree AquaDipTM

Corrosion Preventer

Description:

ChemFree AquaDipTM is a low foam aqueous blend fluid with extremely effective rust inhibiting properties on ferrous metals. It is equally effective in protecting steel surfaces in high humidity conditions during extended indoor storage. From the emulsion, a thin film of coating deposits on metal surfaces.

Directions for Use:

Submerge metal surface in the ChemFree AquaDipTM bath after being cleaned in the SmartWasher[®] Bioremediating Parts Washer System. Remove part from the bath and let it dry. **Never add ChemFree AquaDipTM directly into the SmartWasher Bioremediating Parts Washer System.**

Availability:

ChemFree AquaDipTM is available in 5-gallon boxes and 55-gallons drums.

Specifications:

Appearance: Beige light brown liquid
Odor: Slight fatty oil odor
Density: 1.0000 g/mL
pH: 9.0
Flash Point: None

Performance:

Product Name	Film Thickness (microns)	Humidity Cabinet (Days)	Herbert ChipTest IP 125/77
